Surgical Microscopes

Zeiss NC-4 / PENTERO
Zeiss CS NC 31 / NC-2
Zeiss OPMI VISU Series
Zeiss OPMI Lumera
Leica M841 / M500

FAQ's

What is the difference between used & refurbished equipment?

All of our equipment is brought to original equipment manufacturer's (OEM) specifications through disassembly, inspection, cleaning, repair, replacement of necessary parts and calibration; including special cosmetic restoration giving all equipment a quality finish.

What kind of savings do we offer?

Anywhere from 20% to 80%. Typical savings are around 40% compared to new equipment.

What about service and support?

Most products include a complete one year warranty. Parts and service will be optional for at least seven years after purchase. You can also choose to support your equipment with your own contracted biomedical team.

I am working on a new construction, is refurbished equipment the right fit for me?

We actively outfit new construction and expansion projects with many development companies. We specialize in setting up DeNovo projects and work with a number of equipment planners. Soma Technology, Inc. is proud to be a 'one-stop-shop' for capital equipment when planning constructions.

What happens after the warranty?

The customer has the option to add an extended warranty at the time of their original purchase. Alternatively, the equipment can be rolled into a local biomedical service contact.

PARTS

- Circuit Boards
- Recorders & Rollers
- Displays & LCDs
- Power Supplies
- Patient Modules

ACCESSORIES

(New, Refurbished, Original & New Replacement)

- ECG Cables & Lead Wires
- SpO2 Sensors & Cables
- NIBP Cuffs and Hoses
- CO2 / O2 Sensors
- Defibrillator & ECG Electrodes
- CO2 Sample Lines
- Printer Paper
- Headbands for Light Sources
- Fiber Optic Cables
- and MUCH MORE!

Soma Tech Intl keeps the largest inventory of parts and accessories in the refurbished medical equipment industry, we proudly support parts for all of the equipment we sell. These can be viewed at www.somamedicalparts.com.
